LECTURES

Dragan S. Djordjević

GENERALIZED INVERSES	13
1. Motivation	13
2. Notations	15
3. Inner and Outer Generalized Inverse	17
4. Moore-Penrose Inverse	20
5. Reverse Order Law for the Moore-Penrose Inverse	23
6. Drazin Inverse	26
7. Conclusion	31
Acknowledgements	31
References	31

CONTRIBUTIONS

Ciprian Sorin Acatrinei

ON THE NONCOMMUTATIVE FEYNMAN PROBLEM	35
---	-----------

Edward Anderson

LIE THEORY SUFFICES TO RESOLVE THE LOCAL CLASSICAL PROBLEM OF TIME	43
1. Introduction	44
2. Spacetime versus Canonical Perspectives	46
3. Problem of Time Facets' Original Names	47
4. Relationalism, as Implemented by Lie Derivatives	49
5. Closure, as Implemented by Lie Brackets	52
6. Assignment of Observables	55
7. Constructability, as Implemented by Deformations if Rigidity Holds ..	56
8. Wheelerian Two-Way Route Between Dynamical and Spacetime Lie Claws	58
9. Quantum Counterparts in Outline	59
10. Conclusion	60
Acknowledgements	61
References	62

Paolo Aniello

QUANTUM STOCHASTIC PRODUCTS AND THE QUANTUM
CONVOLUTION 64

**Volodymyr Berezovski, Yevhen Cherevko, Svitlana Leshchenko and
Josef Mikeš**

CANONICAL ALMOST GEODESIC MAPPINGS OF THE FIRST TYPE
OF SPACES WITH AFFINE CONNECTION ONTO GENERALIZED
2-RICCI-SYMMETRIC SPACES..... 78

Rutwig Campoamor-Stursberg

ON SOME STRUCTURAL PROPERTIES OF SEMIDIRECT SUMS OF
 $\mathfrak{so}(3)$ AND ABELIAN LIE ALGEBRAS 88

1. Introduction 89

2. Stability of Lie Algebras and Cohomology 89

3. Semidirect Sums of $\mathfrak{so}(3)$ and Abelian Algebras 93

4. Describing Representations $R_J^I \oplus \Gamma_0$ and $R_J^{II} \oplus \Gamma_0$ 98

5. Describing Representations with Two Components 99

6. Final Remarks 103

Acknowledgements 104

References 104

Adina V. Crişan and Ion V. Vancea

GEOMETRIC AND QUANTUM PROPERTIES OF CHARGED
PARTICLES IN MONOCHROMATIC ELECTROMAGNETIC KNOT
BACKGROUND..... 107

Kensaku Kitada

YANG–MILLS EQUATIONS OF GENERAL CONNECTIONS AND A
CERTAIN SOLUTIONS IN THE QUATERNIONIC HOPF FIBRATION
OVER FOUR-SPHERE..... 121

Jan Křížek, Josef Mikeš, Patrik Peška and Lenka Rýparová

EXTREMALS AND ISOPERIMETRIC EXTREMALS OF THE
ROTATIONS IN THE PLANE 136

Miroslav Kureš

ON COORDINATE EXPRESSIONS OF JET GROUPS AND THEIR REPRESENTATIONS 142

Clementina D. Mladenova and Ivařilo M. Mladenov

CAYLEY MAP FOR SYMPLECTIC GROUPS 154

Vadim Monakhov and Alexey Kozhedub

ALGEBRA OF SUPERALGEBRAIC SPINORS AS ALGEBRA OF SECOND QUANTIZATION OF FERMIONS 165

1. Introduction 166
 2. Grassmann Densities and Relations of CAR Algebra 167
 3. Generalized Dirac Conjugation 169
 4. Additional Gamma Operators $\hat{\gamma}^6$ and $\hat{\gamma}^7$ 171
 5. Discretization of the Momentum Space and Spinor Vacuum 172
 6. Spatial Reflection Operator and Parity Operator P 174
 7. Clifford Reflection of Two Axes and Time Reflection Operators 177
 8. Operators of Complex Conjugation, Time Inversion T , Charge Conjugation C , CT , CPT , iQ 182
 9. Conclusion 185
- References 186

Makoto Nakamura, Hiroshi Kakuhashi and Kouichi Toda

THE TRANSFORMATION OF COMMUTATIVE PHASE SPACE TO NONCOMMUTATIVE ONE, AND ITS LORENTZ TRANSFORMATION-LIKE FORMS 188

Abdigappar Narmanov and Xurshid Sharipov

ON THE GEOMETRY OF SUBMERSIONS 199

Laarni B. Natividad and Job A. Nable

STAR PRODUCT ON THE EUCLIDEAN MOTION GROUP IN THE PLANE 209

Vladimir Pulov and Ivailo Mladenov

A PLETHORA OF NON-BENDING SURFACES OF REVOLUTION:
CLASSIFICATIONS AND EXPLICIT PARAMETERIZATIONS **219**

- 1. Introduction 220
- 2. Axially-Symmetric Non-Bending Surfaces $\mathcal{S}_\varepsilon(\nu, r)$ 224
- 3. Axially-Symmetric Non-Bending Surfaces $\mathcal{S}(\nu)$ 230
- 4. Torus-Like Non-Bending Surfaces $\mathcal{T}_\varepsilon(\delta, r)$ 234
- 5. Comments 237
- References 240
